Permission to Feel-Marc Brackett, Ph.D. 2019-09-03 The mental well-being of children and adults is shockingly poor. Marc Brackett, author of Permission to Feel, knows why. And he knows what we can do. "We have a crisis on our hands, and our children are its victims." Marc Brackett is a professor in Yale University's Student Center and founding director of the Yale Center for Emotional Intelligence. In his 25 years as an emotion scientist, he has developed a remarkably effective plan for helping him, and the children and adults who work with him, find their way back to well-being. The core of his approach is a legacy from his childhood, from an astute uncle who gave him permission to feel. He was the first adult who managed to see Marc for who he really was—a boy who yearned for the company of others. By giving him permission to feel, his uncle made it safe to be Marc. And that was the beginning of Marc's well-being, not what had been temporary. He wasn't alone, he wasn't stuck on a timeline, and he wasn't "wrong" to fear scarred, isolated, and angry. Now, best of all, he could do something about it. Marc's approach is working for him and for thousands of young people, and the research now behind it suggests it could work for your children as well. Marc Brackett, Ph.D. is a world-renowned expert on emotional intelligence for healthy children (and their parents, and teachers, and schools), is a system called RULER, a high-impact and fast-effect approach to understanding and mastering emotions that has already transformed the thousands of schools that have adopted it. RULER has been proven to reduce stress and burnout, improve school climate, and enhance student achievement and well-being. It is a simple, powerful model of effective emotional management that makes a real difference in how and what students learn. Readers will discover how to design an environment for learning that Makes material relevant, rewarding, and engaging. Accommodates tremendous variability in students' brains by giving them multiple options for how to approach their learning. Incorporates Universal Design for Learning (UDL) principles and guidelines. Uses process-oriented feedback and other techniques to spark students' intrinsic motivation. Author Marc Brackett explains how schools can use the same 'emotional brain' concepts to create work environments that reduce professional stress and the all-too-common cycle of burnout, turning the focus back to the students, along with the educators. This book provides a practical, informative guide for understanding how to capture the brain's incredible power and achieve better results at all grade levels, in all content areas.

Character Strengths and Virtues:Christopher Peterson 2013-04-08 "Character" has become a front-and-center topic in contemporary literature, but this term does not have a fixed meaning. Character may be simply defined by what someone does not do, but a more active and thorough definition is necessary, one that addresses certain vital questions. What is character, or more specifically, what is a unique, or a component of different individuals? Does character—how we express it—exist in different forms? What are the best or most effective character traits? How do we evaluate character? What rules are played by family, schools, the media, religions, and the larger culture? This groundbreaking handbook of character strengths and virtues is a unique and unprecedented resource for practitioners and researchers.

The Leader in Me-Joseph A. DiRaku 2016-10-26 The burgeoning multidisciplinary field of social and emotional learning (SEL) now has a comprehensive and definitive handbook covering all aspects of research, practice, and policy. The prominent editors and contributors describe state-of-the-art intervention and prevention programs designed to build students' social and emotional skills. SEL programs and programs and their accompanying CD provide a complete toolkit for using early preventative interventions with elementary-school age children. In ten thoughtful, clearly written chapters, both new and experienced practitioners will find a wealth of research- and evidence-based techniques that link personal child and childhood environmental conditions to academic achievement. This book is the culmination of Marc's development of RULER and his way to share the strategies and skills with readers around the world. It is filled with easy-to-understand explanations of the brain's emotion networks and how they affect learning, paired with specific suggestions for classroom strategies which can make a real difference in how and what students learn.
